SEO / GEO / AEO Audit Report

FULL AUDIT

6/10 <i>On Track</i>	6/10 <i>On Track</i>	7/10 <i>On Track</i>
--------------------------------	--------------------------------	--------------------------------

Audit date: 2026-05-22

Nova Kingdom Rentals — Claude Code AI Audit

Executive Summary

Nova Kingdom Rentals has a solid technical SEO foundation — every route has a canonical tag, Open Graph tags, Twitter cards, and rich Schema.org structured data including Organization, LocalBusiness, FAQPage, Product, and BreadcrumbList types. The AI-crawlability setup is genuinely industry-leading: robots.txt explicitly allows 14+ named bots, and a comprehensive llms.txt is in place. The most urgent issues are product page meta descriptions (8 out of 9 use 36-59-char shortDescriptions instead of 150-160-char optimized descriptions) and 9 product image filenames containing spaces. On E-E-A-T, the site lacks a visible owner biography and displays no testimonials, limiting its authority signals for generative AI engines. Adding HowTo schema for the 3-step booking process is a quick structural win.

Dimension	Score	Status	Key Takeaway
SEO	6/10	On Track	Strong schema and canonical coverage; meta description lengths and product page descriptions need work
GEO	6/10	On Track	Exceptional robots.txt + llms.txt; E-E-A-T limited by missing owner bio and no site testimonials
AEO	7/10	On Track	Rich FAQPage schema (27+ Q&As); HowTo and SpeakableSpecification not yet implemented
Combined	19/30		

Pages Audited

URL	Page Type	Issues
/	Homepage	Rich schema: Organization + LocalBusiness + FAQPage + ItemList + BreadcrumbList
/rentals	Rentals Index	ItemList schema; meta description 183 chars (over limit)
/packages	Packages	BreadcrumbList; meta description 169 chars (over limit)
/lawn-games	Lawn Games	BreadcrumbList; meta description 282 chars (severely over limit)
/about	About	Organization + BreadcrumbList; title 26 chars (no keywords)
/faq	FAQ	FAQPage + BreadcrumbList; title generic — no location keywords
/contact	Contact	BreadcrumbList; good meta structure
/service-areas	Service Areas	BreadcrumbList; title 36 chars, no keyword context
/rentals/360-video-booth	Product: 360 Video Booth	Product schema; metaDescription 183 chars (well-written, slightly over)

URL	Page Type	Notes
/rentals/crown-island-combo	Product: Crown Island Combo	Product schema; metaDescription 55 chars (uses shortDescription — too short)
/rentals/crown-axe-challenge	Product: Crown Axe Challenge	Product schema; metaDescription 49 chars (too short)
/rentals/crown-kick-darts	Product: Crown Kick Darts	Product schema; metaDescription 50 chars (too short)
/rentals/crown-rush-42	Product: Crown Rush 42	Product schema; metaDescription 49 chars (too short)
/rentals/crown-quest	Product: Crown Quest	Product schema; metaDescription 51 chars (too short)
/rentals/crown-cascade	Product: Crown Cascade	Product schema; metaDescription 50 chars (too short)
/rentals/crown-climber	Product: Crown Climber	Product schema; metaDescription 36 chars (shortest — needs urgent attention)
/rentals/crown-carnival-challenge	Product: Crown Carnival	Product schema; metaDescription 54 chars (too short)
/rentals/crown-dino-combo	Product: Crown Dino Combo	Product schema; metaDescription 59 chars (too short)
robots.txt	Robots.txt	Exceptional — explicitly allows 14+ AI and search bots by name
sitemap.xml	Sitemap	50 URLs; proper priority hierarchy (1.0 to 0.7)
llms.txt	LLMs.txt	Comprehensive business summary for AI engines — strong GEO asset
/bouncy-castle-rentals-...	SEO Location Pages (x31)	Location and intent pages; FAQPage schema on each; unique copy per page
/360-video-booth-rental-...	Photo/Booth SEO Pages (x9)	9 booth-specific pages; honest geographic wording; unique FAQs each

SEO Analysis — 6/10

Technical On-Page

Signal	Finding	Status
Title Tags	Homepage 73 chars (over 60). /about (26) and /faq (26) are too short with no keywords. /lawn-games (40) and /packages (44) are short. Only /contact (49) approaches optimal range.	Needs Attention
Meta Descriptions	Only /faq is within optimal range (157 chars). Homepage is 182, /lawn-games is 282 (nearly double the limit), /about is 194, /rentals 183, /contact 175, /packages 169, /service-areas 186. All core pages exceed 160-char limit.	Needs Attention

Signal	Finding	Status
Product Meta Descriptions	8 of 9 product pages use shortDescription (36-59 chars) as meta description. Only 360 Video Booth has a dedicated metaDescription (183 chars). This is the single most impactful fix available.	Missing
Canonical Tags	Self-referencing canonical present on every generated route (all 49 pages). Consistent and correct.	Good
Viewport Meta	Present on all pages: width=device-width, initial-scale=1.0. Mobile-ready.	Good
Open Graph Tags	og:title, og:description, og:image, og:url, og:type present on all pages. Image is absolute URL.	Good
Twitter Cards	summary_large_image with title, description, image on all pages.	Good
Heading Structure (H1)	H1 tags are React-rendered client-side. Static HTML files do not contain H1 tags. Search bots without JS execution see no H1. Schema title compensates partially.	Needs Attention
Image Filenames	9 of 10 product images have spaces in filenames (crown island combo.jpeg, crown axe thrower.jpeg, etc.). Should use hyphens for SEO.	Needs Attention
URL Structure	Core routes clean (/rentals, /packages, /faq). SEO page slugs are keyword-rich and hyphenated. No parameters or stop words.	Good
Favicons + Manifest	site.webmanifest present. Favicons in multiple sizes (16x16, 32x32, apple-touch-icon). Well implemented.	Good

Content Quality

Signal	Finding	Status
Homepage Content	Strong hero with business name, location, value proposition. Trust badges: Fully insured, Setup included, Bridgewater-based. How It Works 3-step process. Popular products section.	Good
Product Pages	10 product pages with names, taglines, prices, bestFor lists, features, setupNotes, duration, specs, and dimensions. Full descriptions are detailed and factual.	Good
Package Pages	9 packages with price, savings, included items, descriptions, and booking notes. Prices range \$310-\$1,099. Clear value communication.	Good
Lawn Games	12 games listed with name, description, and bestFor for each. Standalone pricing clearly stated from \$175. Good local content depth.	Good
FAQs	27 Q&A; pairs covering booking, delivery, setup, safety, weather, damage, and policy. Comprehensive and useful for both users and search engines.	Good

Signal	Finding	Status
SEO Location Pages	31 location pages plus 9 photo booth pages — each has unique intro, serviceAreaText, bestFor list, 4 FAQ pairs, and CTA. Not thin content.	Good
Blog / Content Strategy	No blog, news, or article section exists. Without editorial content, the site cannot rank for long-tail informational queries or be cited by AI engines as an authority source.	Missing
Content Freshness	No publication or update dates visible on product or main pages. Sitemap lastmod dates are present but not user-visible.	Needs Attention

Structured Data

Signal	Finding	Status
Homepage Schema	@graph with 5 types: Organization, LocalBusiness+EntertainmentBusiness (with areaServed, phone, email, address, sameAs), ItemList (10 products), FAQPage (27 questions), BreadcrumbList. Exceptionally rich.	Good
Product Schema	Product schema on all 10 product pages with name, image, description, brand, category, offers (price, availability, URL), and BreadcrumbList. Properly structured.	Good
FAQPage Schema	Present on homepage (27 Q&As;) and /faq page. All 40 SEO location pages each have their own 4-item FAQPage. High featured snippet eligibility across 42 pages.	Good
HowTo Schema	The "How It Works" 3-step booking process is not marked up with HowTo schema. Perfect candidate: Choose your fun -> Send date and address -> We confirm and deliver.	Missing
SpeakableSpecification	No SpeakableSpecification markup anywhere on the site. Helps AI assistants identify audio-suitable content.	Missing
Review / AggregateRating	No Review or AggregateRating schema. Google review link exists in siteInfo but no rating count or score is surfaced in schema or on-page.	Missing

GEO Analysis — 6/10

E-E-A-T Assessment

Signal	Finding	Status
Named Owner / Author	No named individual mentioned anywhere on the website. The legal entity "Baaz Global Inc." appears in schema only. AI engines cannot establish human expertise or experience without a named person.	Missing

Signal	Finding	Status
About Page Quality	Title is "About Nova Kingdom Rentals" with no keywords. Page describes the business but contains no team biography, founding story, personal experience narrative, or credentials. Missed E-E-A-T opportunity.	Needs Attention
Contact Information	Phone (902-990-0005) and email (booknovakingdom@gmail.com) are present. Gmail address reduces authority signals vs. a domain email (info@novakingdomrentals.com).	Needs Attention
Insurance / Trust	"Fully insured" prominently stated as a trust badge on homepage and in siteInfo. Positive trust signal. Setup-confirmation policy also builds trust.	Good
Testimonials / Reviews	No customer testimonials, star ratings, or review excerpts appear anywhere on the site. A Google Review link exists in data but is not displayed. AI engines and users cannot see social proof.	Missing
Social Profiles	Instagram, Facebook, WhatsApp linked in siteInfo. sameAs in Organization and LocalBusiness schema includes all three. Consistent entity linking.	Good
Awards / Certifications	No industry certifications, awards, press features, or community recognition mentioned.	Missing

Content for AI Synthesis

Signal	Finding	Status
Factual Density	Excellent. Specific prices: Crown Island Combo \$310, Crown Rush 42 \$450, Crown Axe Challenge \$180, Crown Kick Darts \$160. Travel: \$0.72/km after 15km free. Wind limit: 40 km/h. 360 Booth: \$249 standalone, \$199 add-on. AI engines can cite all of these.	Good
Clear Value Proposition	Bridgewater-based, South Shore primary market, larger Maritime bookings by quote. Geographic clarity reduces AI hallucination risk.	Good
Entity Clarity	"Nova Kingdom Rentals" used consistently across all pages, schema, llms.txt, and robots.txt.	Good
External Source Citation	No external sources cited anywhere on the site. No links to industry associations or safety standards. AI engines prefer pages that cite sources.	Missing
Content for AI Citation	No blog, how-to guides, or buyer guides exist. Site is entirely transactional. AI engines cannot cite it for informational queries about bouncy castles or event planning.	Missing

Technical GEO

Signal	Finding	Status
HTTPS / Security	All canonical URLs use https://. Site is on HTTPS. Trust signal confirmed.	Good
robots.txt (AI Crawlers)	Industry-leading. Explicitly names and allows: OAI-SearchBot, ChatGPT-User, GPTBot, ClaudeBot, Claude-SearchBot, Claude-User, Googlebot, Google-Extended, Bingbot, PerplexityBot, Perplexity-User, Applebot, FacebookBot, msnbot.	Good
llms.txt	Present at /llms.txt with comprehensive business summary: contact, service area, booking policy, delivery pricing, all rentals with pricing, all lawn games, and key policies. Strong GEO differentiator.	Good
Static HTML Generation	Custom Python generator creates static index.html for all 49 routes with meta tags and schema server-side. AI crawlers that do not execute JS still receive full structured metadata.	Good
sameAs / Entity Graph	sameAs links to Instagram, Facebook, WhatsApp in both Organization and LocalBusiness schema. Strengthens entity graph.	Good
Domain Email	Business email is booknovakingdom@gmail.com. Domain emails carry more authority for E-E-A-T and professional trust signals.	Needs Attention

AEO Analysis — 7/10

Featured Snippet Eligibility

Signal	Finding	Status
FAQPage Schema (Homepage)	27 question-answer pairs in FAQPage schema. Questions are natural-language: "How far do you deliver?", "What is the wind limit?" All have concise, direct answers. High featured snippet eligibility.	Good
FAQPage Schema (/faq)	FAQPage schema also implemented on the dedicated /faq page with full question set. Correct implementation.	Good
SEO Page FAQs	All 40 location/booth SEO pages each have 4 unique FAQ pairs with FAQPage schema. Snippet eligibility across 42 pages for location-specific queries.	Good
Direct Answer Paragraphs	FAQ answers are concise and direct: "The first 15 km from Bridgewater is free. After that, travel is \$0.72/km." Exactly the format Google pulls for featured snippets.	Good
Definition Patterns	No clear "X is a type of Y that..." definition sentences for primary products. Adding these would increase eligibility for definition snippets.	Needs Attention
List Content	bestFor lists on product pages and 12-item lawn games list are structured arrays — good list snippet candidates.	Good

Structured Answer Formats

Signal	Finding	Status
FAQPage Schema	Correctly implemented across homepage, /faq, and all 40 SEO location/booth pages. 27 core Q&As; plus 4 per location page = 187+ question-answer pairs with schema across the site.	Good
HowTo Schema	"How It Works" 3-step booking process (Choose your fun -> Send date and address -> We confirm and deliver) is present in data but not marked up as HowTo schema. Direct missed AEO opportunity.	Missing
SpeakableSpecification	No SpeakableSpecification markup. Adding to key FAQ answers would enable voice assistant citation (Google Assistant, Siri, Alexa).	Missing
BreadcrumbList	BreadcrumbList implemented on all 49 routes. Proper position numbering and item URLs. Enables breadcrumb display in SERPs.	Good
Table / Comparison Content	Package comparison data (9 packages with price, savings, items) exists but no comparison table schema. Adding a visible table could increase table snippet eligibility.	Needs Attention

Voice Search Readiness

Signal	Finding	Status
NAP in Schema	Name (Nova Kingdom Rentals), telephone (902-990-0005), email, address (Bridgewater, Nova Scotia, CA) all present in LocalBusiness schema. Essential for local voice queries.	Good
Conversational Language	FAQ answers use natural phrasing: "Yes. Nova Kingdom Rentals handles setup and takedown." Matches voice search response patterns.	Good
Long-Tail Question Coverage	Strong coverage: wind limits, surfaces, supervision, silly string, deposits, delivery range. "How far does Nova Kingdom Rentals deliver" is directly answered.	Good
Speakable Markup	SpeakableSpecification schema not implemented. Signals which content is optimized for audio delivery.	Missing
Local Intent Signals	31 location pages target Bridgewater, South Shore towns, Halifax, Dartmouth, Truro, Sydney, Yarmouth. Strong local voice search coverage for NS.	Good
Pricing in Natural Language	Prices stated plainly: "\$310", "\$0.72/km", "first 15 km free". Voice engines can read these as direct answers to cost queries.	Good

Priority Recommendations

Priority	Issue	Item	Effort	Impact
Critical	Product page meta descriptions: 8/9 use shortDescription (36-59 chars instead of 150-160)	SEO	Low	Critical
High	Core page meta descriptions: 7/8 exceed 160-char limit (/lawn-games at 282 chars)	SEO	Low	High
High	Image filenames with spaces: 9/10 product images (crown island combo.jpeg etc.)	SEO	Medium	High
High	Add owner name and brief bio to About page (E-E-A-T signal for GEO ranking)	GEO	Low	High
High	Display customer testimonials or Google reviews on homepage or About page	GEO	Medium	High
Medium	Optimize title tags: /about (26 chars, no keywords), /faq (26), /service-areas (36)	SEO	Low	Medium
Medium	Add HowTo schema for the 3-step "How It Works" booking process	AEO	Low	Medium
Medium	Start a blog or resources section for content marketing and AI citation eligibility	GEO	High	High
Medium	Add SpeakableSpecification to key FAQ answers and business description	AEO	Low	Medium
Medium	Use a domain email (info@novakingdomrentals.com) instead of Gmail	GEO	Low	Medium
Quick Win	FAQ title: "FAQ Nova Kingdom Rentals" -> "Bouncy Castle Rental FAQ Bridgewater NS"	SEO	Very Low	Medium
Quick Win	Service Areas title: add location keywords — "Service Areas Bridgewater & NS"	SEO	Very Low	Medium
Quick Win	Add Review/AggregateRating schema using Google Review data for star display in SERPs	SEO/AEO	Low	High
Quick Win	Add product definition sentences: "Crown Island Combo is a tropical combo inflatable..."	AEO	Very Low	Medium

What's Working Well

Strength	Evidence
robots.txt AI Setup	Explicitly allows 14+ named bots: OAI-SearchBot, ChatGPT-User, GPTBot, ClaudeBot, Claude-SearchBot, Google-Extended, PerplexityBot, and more. Most small businesses ignore AI crawlers entirely.
llms.txt	Present at /llms.txt with complete business info, all rentals and pricing, all lawn games, service area, booking policy, and key rules. Strong GEO differentiator.
Homepage Schema Depth	Five schema types in one @graph: Organization (sameAs), LocalBusiness+EntertainmentBusiness (address, phone, email, priceRange, areaServed), ItemList (10 products), FAQPage (27 pairs), BreadcrumbList.

Strength	Evidence
FAQPage Coverage	27 Q&A; pairs on homepage and /faq. Additional 4 Q&As; per location page across 40 SEO pages. 187+ question-answer pairs with schema site-wide — strong featured snippet eligibility.
Static HTML Generation	Custom Python generator creates static index.html for every route with meta tags and schema server-side. AI crawlers that do not execute JS receive full structured metadata for all 49 pages.
SEO Page Matrix	31 location pages targeting Bridgewater, South Shore, Halifax, Dartmouth, Truro, Sydney, and NS-wide queries. 9 photo/360 booth pages for provincial, city, and regional intent.
Canonical Tags	Self-referencing canonical on all 49 generated routes — consistent and correct. No duplicate content risk.
Factual Pricing	Specific prices throughout: \$310, \$450, \$180, \$0.72/km, \$249/\$199 for 360 booth. Factual density that AI engines extract and cite for cost queries.
Geographic Honesty	All out-of-province pages explicitly state "Bridgewater-based", "travel quoted separately", "we do not have a local office in...". Prevents misleading AI representations.
BreadcrumbList	BreadcrumbList with correct position numbers on all 49 pages. Enables SERP breadcrumb display.

Glossary

Key terms used throughout this audit.

SEO (Search Engine Optimization)

The practice of optimizing a website so that traditional search engines like Google and Bing rank it higher in search results. Focuses on technical signals (meta tags, schema, canonicals), content quality, and link authority.

GEO (Generative Engine Optimization)

Optimizing for AI-powered search engines (Perplexity, ChatGPT Search, Google AI Overviews, Claude, Gemini) that synthesize answers from multiple sources and cite pages. GEO rewards factual richness, named authorship (E-E-A-T), clean crawlability, and machine-readable data like llms.txt.

AEO (Answer Engine Optimization)

Optimizing for featured snippets, People Also Ask boxes, and voice search assistants that need direct, concise answers. AEO focuses on FAQ schema, HowTo schema, question-phrased headings, and factual answers.

E-E-A-T

Experience, Expertise, Authoritativeness, Trustworthiness — Google's framework for content credibility. Named authors, biographies, credentials, reviews, and transparent contact information all contribute.

Schema.org / JSON-LD

Structured data embedded in HTML as JSON that tells search and AI engines what a page is about — business type, products, prices, FAQ pairs, breadcrumbs, authors.

Canonical Tag

An HTML link element that tells search engines which URL is the "official" version of a page, preventing duplicate content penalties.

llms.txt

A plain-text file (analogous to robots.txt but for AI language models) that provides machine-readable business information for AI engines.
